2005-2008

August 2005

SBC Indiana
Presubscribed Interexchange Carrier (PIC) Change Charge
Service Order
Nonrecurring Cost Study
2005 - 2008

Overview and Methodology

Purpose

The purpose of this cost study is to provide updated costs for PIC Change orders. For reference, an acronym glossary is included as a separate tab within this cost study.

Service Description

Presubscription is a procedure whereby an end user may select and designate to the Telephone Company an Interexchange Carrier (IC) to access, without dialing an access code, for interLATA calls. This IC is referred to as the end user's primary IC. A charge associated with interLATA is a PIC.

Rate Element Descriptions

Combination Manual PIC/LPIC Charge, Cost per Change
Combination Mechanized PIC/LPIC Charge, Cost per Change

Activity-Based Costing

Activity-Based Costing is a widely used method of identifying costs. The structure of an ABC study is based on the fact that activities performed by the company consume resources, and these resources have a specifically identifiable cost. Activities, then, are used to provide services. This gives a logical, easy-to-follow flow through the costing procedure.

Activity-Based Costing uses a number of specific terms, such as *resource*, *activity*, *cost object*, and *drivers* which have simple, yet special meanings.

- A *resource* can be a piece of equipment, a labor rate, or a vendor contracted expense.
- An *activity* is an action that consumes resources. The cost of the activity is calculated based on the cost of the resources that the activity consumes, and the resource driver, or the quantity of resources the activity consumes.
- A *cost object* is a product (i.e., PIC Change).
- *Drivers* are specific units that represent quantities of activities and resources. For example, time in minutes, or orders per line may be drivers. Resource drivers are the quantity of resources consumed by an activity. Activity drivers are the number of activities necessary to provide the service.

The Basics of Activity-Based Costing are:

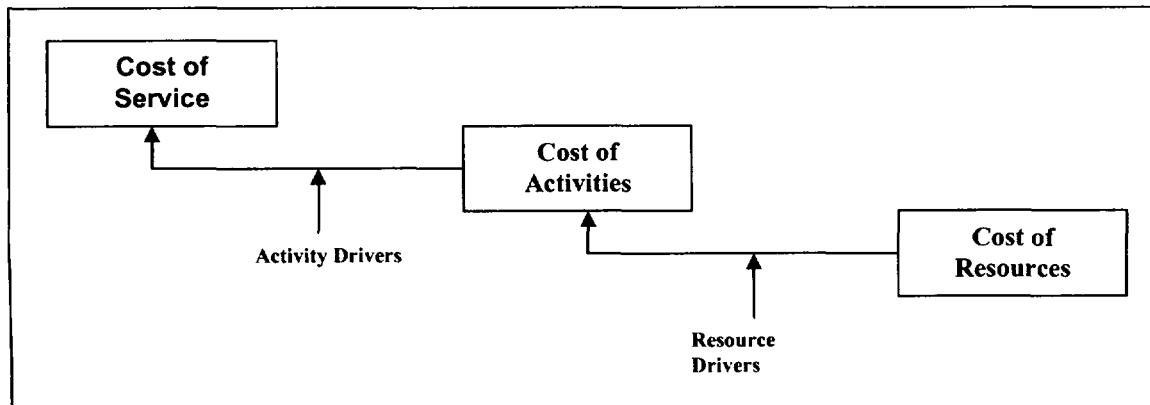

- Cost objects (i.e., services) are provided by activities.
- Activities consume resources.
- Consumption of resources drives costs.

SBC Indiana

Service Order
Nonrecurring Cost Study
2005 - 2008

Overview and Methodology

Figure 1 illustrates the flow of Activity-Based Costing.

Figure 1

Line and Change Quantity Efficiency

End user may have more than one access line and ask to have their PIC changed on multiple lines on the same request (or order). In addition, on the same request, the same end user may also request LPIC changes on the same lines. There are efficiencies associated with performing PIC changes on multiple lines and performing a LPIC change at the same time as a PIC change. This efficiency is included in the cost results.

The SMEs provided time estimates that represent the total activity time required to make all changes on all lines on an average size request. In other words, the SMEs, based on their experience processing requests, estimated an average number of changes required on a request and provided the total time to process all changes. The Bill of Costs tab adjusts the per request manual costs to per change by multiplying the resulting business channel costs by orders per change (or the inverse of changes per order), thereby accounting for any line and change quantity efficiencies resulting from multiple lines or changes per line on the same request.

Labor Rates

The labor rate represents the cost to SBC of a single hour of labor. The labor rate is inflated (based on the Consumer Price Index) to the midpoint of the study period to make the labor cost representative of the entire study period. A more detailed discussion of labor rates and inflation factors is found later in this methodology.

SBC Indiana
Presubscribed Interexchange Carrier (PIC) Change Charge
Service Order
Nonrecurring Cost Study
2005 - 2008

Overview and Methodology

Inflation Factors

Inflation Factors are utilized to provide one cost over a multi-year period. The inflation factors are developed by using the forecast of the Consumer Price Index (CPI). The CPI represents changes in prices of all goods and services purchased for consumption by urban households. User fees (such as water and sewer service) and sales and excise taxes paid by the consumer are also included. Income taxes and investment items (like stocks, bonds, and life insurance) are not included.

Labor Rate Development Methodology

Labor rates identify the cost to the firm of consuming a particular resource—an hour of labor. Labor rates begin with a basic hourly wage or salary, and then include costs directly caused by labor that are not captured in the basic wage. These other direct labor costs include:

- break time and/or tour length costs,
- paid absence costs,
- special payments such as team awards and recognition,
- payroll taxes, pension costs, benefit costs,
- support assets, including capital costs associated with support assets
- Other direct costs such as travel and training, and clerical support and supervision.

Labor rates are developed at the proper level of detail to provide accurate costs for specific activities. First, SBC looks at specific groups of function codes (which designate a specific job function) or activity codes (which designate a specific job activity). These function/activity codes are part of SBC's functional accounting system used to report expenses company-wide. For example, 21XX is the group of all wages and expenses charged to function codes or activity codes that begin with "21", which in this example represents Operator Services functions and activities.

Within the specific group, SBC develops labor rates by Market Zone (for management employees) or Wage Category (for non-management employees). The Market Zone and Wage Category are specific job classifications that determine how much the company pays for a particular job.

The Labor rates in this study begin with an average wage per hour from payroll records. SBC derives relationships of expenses to wages, or expenses to hours worked, to develop labor factors or loadings that it then applies to basic wages to produce total hourly labor cost. All base labor rates in this study represent calendar year 2003. If SBC did not have current labor base rates for a particular state or job title, the most recent labor rate available was adjusted by bringing the basic wage portion of the labor rate current and updating the benefit factor using the most recent data available.

For more information, separate Labor Rate Development documentation is available.

Nonrecurring Cost Study
2005 - 2008

Overview and Methodology

Cost Study Assumptions and Parameters

- TSLRIC Methodology
- Slamming costs are included in the PIC change charge
- Study period is 2005 – 2008
- Labor Rates are base year 2003, adjusted to 2006, which is the midpoint of the planning period (2005 – 2008)

POP assigns request to the next available MSS capable of working the task type (order type). Exit POP system. Loader delivers the request to the assigned MSS.	BCS	Technical Associate	\$58.85	5.00	100%	\$4.90	
65	Access Electronic Processing (EPRO) system and enter required information, i.e., billing info, authorized distributor info, order info. Approximately 30-50 entries may be required to be populated (customer name, bill telephone number, order number, circuit information, working telephone number of PIC change). EPRO contains a lot of detailed tracking information.	BCS	Technical Associate	\$58.85	5.00	100%	\$4.90	
66	Access Bill Inquiry (BI) system to verify current carrier for PIC/LPIC. The PIC or LPIC code in the Customer Service Record (CSR) is not always in a specified location of the record. Locating the code can take several minutes to find. Access Service Provisioning System (SPS) to verify current carrier for PIC or LPIC and any pending orders.	BCS	MSS	\$69.13	3.00	100%	\$3.46	
67	Access RDA system, verify/obtain the correct PIC or LPIC code for the carrier requested.	BCS	MSS	\$69.13	2.00	100%	\$2.30	
Issue ASON (ACIS order/record change) order and verify order goes 2Pending.								
68	Access ASON and manually create the order from scratch. Approximately 20-30 entries may be required. End order and pull order back up to view to ensure the order has flowed through to 2Pending. (2Pending means the order is pending, there are no errors on the order, the order is ready to flow through on the due date and the order flows to downstream departments.) If order goes 1Pending (error out; normally formatting error on PIC changes), MSS corrects order, end order and pulls order back up to view to ensure the order has flowed through to 2Pending.	BCS	MSS	\$69.13	5.00	100%	\$5.76	
69	Access note screen in BI and note order information.	BCS	MSS	\$69.13	1.00	100%	\$1.15	
70	Access EPRO system, pull up track number, x the appropriate field to show request is complete. Send order confirmation to originator via fax or email.	BCS	MSS	\$69.13	1.00	100%	\$1.15	
71	ACTIVITY ENDS WITH:							
72	Access POP system, pull up track number and complete the request.	BCS	MSS	\$69.13	1.00	100%	\$1.15	
								\$25.15

Presubscribed Interexchange Carrier (PIC) Change Charge
Nonrecurring Cost Study

2005-2008

August 2005

Glossary	
AAC1	Intralata Access Carrier ASON+ screen for Intralata carrier PIC changes.
ACIS	Ameritech Customer Information System System that does billing of retail customers exchange tariff network access or channel services, equipment and/or usage products and services. It downloads billing based on bill periods.
ASC	Access Service Center Location where service representatives are employed. The ASC was previously called the ICSC (Interexchange Carrier Service Center).
ASON	ACIS Part of the ACIS ordering and billing system, used for the mechanized entry of retail service orders. ASON is used for the basic POTS service and ASON+ for the more complex products and services.
BCS	Business Communication Services
Bi	Billing Inquiry Subsystem of ACIS
BORC	Bill of Resource Costs The section of the cost study that shows the cost of each resource. Resources can be labor such as a service representative's time or equipment such as a multipurpose position. In the case of this study it is labor.
BRI	Basic Rate Interface
BTN	Billed Telephone Number
CARE	Customer Account Record Exchange Application that interfaces with the interexchange carriers to provide them with tariffed FCC mandated billing information and optional ALDIS products.
CCC	Consumer Call Center Consumer group of service representatives taking inbound calls from customers. The service representatives handle inquiries for products and services offered by SBC-East.
CMI Aspen Compliance Statement	Outside vendor that handles adding PIC/LPIC protection.
CRD	Competitive Response Database Scripted request to access customer's records
CSR	Customer Service Record Database that receives and sends files to downstream systems to process orders.
CTI	Computer Telephony Information System used by service representatives to place and receive calls.

August 2005

Glossary	
EAC	Equal Access Carrier ASON+ screen for Intralata carrier PIC changes.
EPRO	Electronic Processing
ESON	English Service Order Negotiation Ordering system used in Brecksville (Ohio), Saginaw (Michigan) and Pewaukee (Wisconsin).
LPIC	Local Presubscription Interexchange Carrier Presubscription The Intralata carrier selected by the customer.
PIC	Interexchange Carrier Presubscription The Intralata carrier selected by the customer.
POP	Productivity Order Profile An application which routes electronic orders to the proper Call Center and to an individual Customer Advocate, matching skills with order content.
PPC	Prohibit PIC Change FID used to order add or remove PIC freeze.
PPL	PIC Protect Local FID used to order add or remove LPIC freeze.
RDA	Reference Deployment Automation An application that delivers web-based GUI to automate the manually intensive Rapid Deployment table update process.
Script Tag	Scripted request to ask the customer if everything requested has been handled properly.
SCRT	Slamming Complaint Resolution Team This group resolves all customer slamming complaints.
SPS	Service Provisioning System Provides on-line entry of ISDN and Centrex provisioning requests. Mechanized means of transmitting Centrex provisioning forms from marketing downstream to network departments. Also provides a means of transmitting information provider requests between C
